

**FREEWAT - FREE and open source tools for WATER resource
management**

University of Tartu Office in Tallinn

Teatri väljak 3

23rd of August 2017

Participation is free of charge but registration is compulsory

This workshop aims at providing a brief overview of the project and the final features of FREEWAT modeling software will be presented. In addition, an overview of the results of the training courses held in Estonia will be given together with the suggestion how to improve groundwater models. Since the calculations of groundwater resources are closely related to the groundwater modelling, an overview of the research on groundwater resources in Estonia will be provided, too in order to provide an almost exhaustive picture of the status of art.

AGENDA

09.45-10.00	Registration & Welcome by the Organisers		
10.00-10.45	Introduction of Horizon 2020 project FREEWAT and FREEWAT Modeling program	A. Marandi, M. Polikarpus	University of Tartu, Estonia
10.45-11.30	Summary and outcomes of FREEWAT trainings in Estonia: <i>What the non-specialists need to know about groundwater modeling</i>	A. Marandi	University of Tartu, Estonia
11.30 – 12.00	Break		
12.00-13.00	Summary of FREEWAT Case Study in Selisoo	A. Marandi, M. Kohv	University of Tartu, Estonia
13.00-13.45	Overview of the calculations of groundwater resources in Estonia–	I. Tamm	Maves, Estonia
13.45-14.30	Discussion & Conclusions	A. Marandi	University of Tartu, Estonia
